

New York

Zurich

density, Chicago is less polluted than its comparison cities.

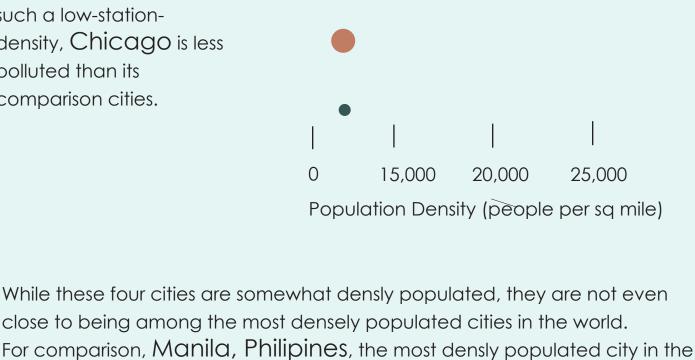

India, at 99,293 people per square mile.

The more stations per

the less pollution. For

such a low-station-

square mile (station density),

Zurich

Size in Square Miles

Pollution and Population Density

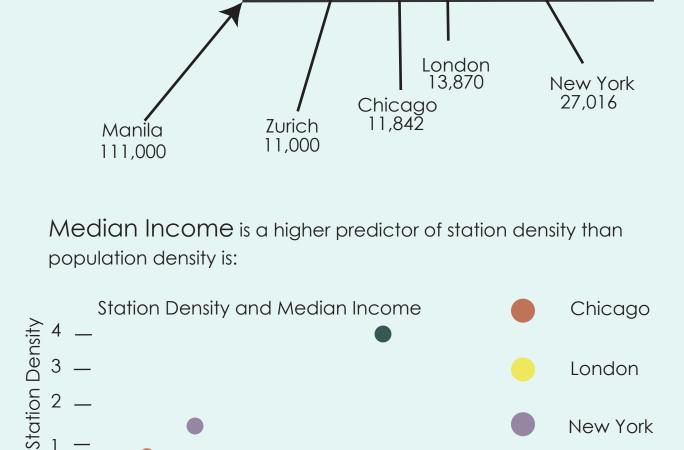

stations per square mile, lowest

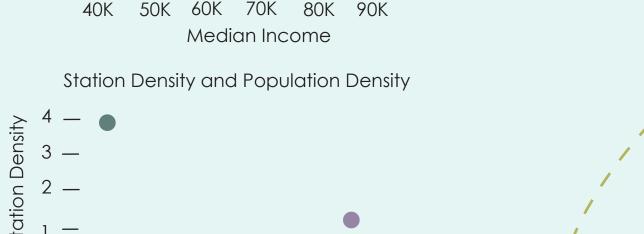

pollution index, shortest commute

times and highest median income.

Population Density Compared with Manila 0 0

world, has 111,000 people per square mile, followed by Titagarh,

*I computed Station Density by dividing the number of train stations by the size of the city in square miles.

**Pollution Index is determined by combining the air quality index and the water quality index. More information is at

http://www.numbeo.com/pollution/rankings_current.jsp.

Note: All distances were converted to miles and monetary amounts were converted to United States Dollars.
